Iseta – Behind the Roadblock is a film published on May 25th 2020. It is about a witness, a school master who survived because his ethnicity was written wrongly on his ID card as he stood with the killers at the roadblock, helpless; the mother of a victim hiding in the house, just feet away, waiting endless minutes to be told her daughter is finally dead; the brother beaten senseless and lying in the ditch told kindly by his friend, “let me beat you, but I will not kill you” while his sister dies beside him; the looter who removed the doors from the victims houses as they were left to die – and most remarkably, the wife of the killer, who secretly carried two babies through the front line to save them before returning to her murderous husband.

Finally the search for the killers leads to the local court where on the last day a new arrest brings in the laughing militia leader and killer, caught on camera beating his neighbors to death.
